

CONTENTS**Features****356****Viewpoint: The upshot of forest planning**

Neil Sampson looks at the outcome of national forest planning

357**From hoes to herbicides: Agriculture and groundwater quality**

George R. Hallberg provides a primer on groundwater contamination

365**Weed control in conservation tillage**

William C. Koskinen and Chester G. McWhorter discuss factors affecting weed control in conservation tillage

371**Erodible land and state water quality programs: A linkage**

Clayton W. Ogg explains how states can use the new federal conservation provisions to improve water quality programs

374**Total alkalinity of surface waters: A map of the western region**

James M. Omernik and Glenn E. Griffith assess the extent of alkalinity in western streams and lakes

379**Agriculture and soil conservation in Poland and the Soviet Union**

Donald E. Van Meter relates highlights from a tour of eastern Europe

381**Treating critical areas in the Tennessee Copper Basin**

Gary L. Tyre and Ronald G. Barton describe a successful reclamation project

383**Growth management: Two county approaches in the Pacific Northwest**

Jeffrey G. Buckland analyzes urban/rural land conflicts in Oregon and Washington

386**Commentary: New conservation leverage: We're in the money**

Ken Cook discusses current reaction to conservation compliance and related provisions in the 1985 farm bill

390**Commentary: What role water markets?**

Lawrence Mosher offers a new perspective on water allocation

392**Commentary: Toward conservation transactions**

Tom Barlow points out that the monetary free market cares little about conservation
