

CONTENTS**Features****142****Viewpoint: The Leopold legacy for soil conservation**

Melville H. Cohee relates his personal recollections of Aldo Leopold's contributions to the "science of land health"

144**The farmer as conservationist: Aldo Leopold on agriculture**

Curt Meine reminds us that many of Leopold's philosophies were based on work with farmers and others in agriculture

150**Managing the Great Lakes shoreline hazard**

Reid D. Kreutzweiser tells how governments and citizens in Canada and the United States are attempting to cope with fluctuating water levels in the Great Lakes

**155****Soil loss tolerance: Fact or myth?**

Leonard C. Johnson reviews the history of T values and raises some important questions about the assumptions on which they are based

161**Coordinated resource management planning: Does it work?**

E. William Anderson and Robert C. Baum assert that getting resource owners, managers, and users working together as a planning team makes for much more effective resource management

167**Commentary: Linking countryside and city: The use of "greenways"**

Charles E. Little examines the report by the President's Commission on American Outdoors and the proposal therein for a nationwide system of greenways

169**Commentary: Large farm equipment and soil erosion**

Jim Bender says that large, modern farm equipment can be used to achieve soil and water conservation goals

170**More benefits with fewer acres please!**

Michael Dicks takes a close look at how success of the conservation reserve program is measured

Departments**138****The SCSA view****140****Pen points****174****In the news****179****Professional services & classifieds****180****Upcoming****181****Books, etc.****Research reports****183****Quantifying the effects of past soil erosion on present soil productivity**

R. B. Daniels, J. W. Gilliam, D. K. Cassel, and L. A. Nelson

187**Using straw in steep furrows to reduce soil erosion and increase dry bean yields**

M. J. Brown and W. D. Kemper

191**Reforestation tax incentives and cost-sharing in North Carolina: A question of efficiency**

Jack P. Royer

194**Economic costs of reservoir sedimentation: A regional approach to estimating cropland erosion damage**

Bradley M. Crowder

198**A soil-conserving system for converting woodland to pasture**

A. E. Smith, J. J. Silvoy, and L. L. Goodroad

200**Soil contamination by irrigation and capillary rise of groundwater**

Marsha I. Sheppard and E. J. Dzik

205**Effect of simulated soil erosion on wheat yields on the humid Canadian prairie**

R. Morrison Ives and C. F. Shaykewich

208**Evaluation of ridge planting systems on a poorly drained lake plain soil**

D. J. Eckert

211**Seasonal variation of soil erodibilities in southwestern Quebec**

P. C. Kirby and G. R. Mehuys

Cover: Grazing is but one of many uses of land that often are integrated in the coordinated resource management planning process. See page 161. Soil Conservation Service photo by Ron Nichols.

Journal of Soil and Water Conservation (ISSN 0022-4561) is published six times a year in January, March, May, July, September, and November by the Soil Conservation Society of America, 7515 N.E. Ankeny Road, Ankeny, Iowa 50021-9764. Second class postage paid at Ankeny, Iowa, and additional mailing offices. POSTMASTER: Send address changes to *Journal of Soil and Water Conservation*, 7515 N.E. Ankeny Road, Ankeny, Iowa 50021-9764.
