

**CONTENTS****Features****6  
Viewpoint: "New Perspectives" for the Forest Service**

Winifred B. Kessler tells how the Forest Service is attempting to dispense with "business as usual" as a means of staying in tune with public values

**Sustainable Development: Growth without losing ground**  
Rebekah Doyle looks at the issues confronting natural resource managers in achieving economic growth without undue environmental degradation

**Do we have a national policy?**

► M. Schad says policy in the United States finally has come and too late

**Features**

► Schilfgaard outlines principles around which formulate a new national water policy

**FACTA 1990: Conservation and environmental highlights**

Wendy L. Cohen, Andrew W. Hug, Abeba Taddese, and Kenneth A. Cook summarize the conservation, environmental, and consumer provisions in the new farm bill

**23  
Managing Oregon's estuarine resource lands**

Philip L. Jackson reviews one of the first attempts at mitigation banking to balance development with maintenance of fragile ecosystems

**27  
Advances in wind and water erosion prediction**

George R. Foster introduces a series of articles about new tools for erosion prediction

**30  
RUSLE: Revised universal soil loss equation**

Kenneth G. Renard, George R. Foster, Glenn A. Weesies, and Jeffrey P. Porter summarize the work done to update this 25-year-old erosion prediction tool

**34  
WEPP: A new generation of erosion prediction technology**  
John M. Laflen, Leonard J. Lane, and George R. Foster describe the Water Erosion Prediction Project and its implications for natural resource management

**39  
WEPP: Soil erodibility experiments for rangeland and cropland soils**  
J. M. Laflen, W. J. Elliot, J. R. Simanton, C. S. Holzhey, and K. D. Kohl describe the experimental procedures used in developing the WEPP model

**Commentary**

**45  
Conservation in the 1990 farm bill: The revolution continues**  
Jeffrey A. Zinn discusses the evolution of the new farm bill and how the various interest groups fared in the policy game

**Research reports**

**59  
Terrain analysis: Integration into the agricultural nonpoint source (AGNPS) pollution model**  
John C. Panuska, Ian D. Moore, and Larry A. Kramer

**64  
Sediment deposition in a forested inland wetland with a steep-farmed watershed**  
Sherwood C. McIntyre and James W. Naney

**66  
Pearl millet versus grain trash mulches for increasing soil water and cotton yields in a semiarid region**  
J. D. Bilbro and D. W. Fryrear

**69  
Montana extension initiative focuses on private well quality**  
J. W. Bauder, B. A. White, and W. P. Inskeep

**75  
Large storm effects on total soil erosion**  
W. M. Edwards and L. B. Owens

**78  
A comparison of wing-chisel tillage with conventional tillage on crop yield, resource conservation, and economics**  
M. D. Heilman, M. V. Hickman, and M. J. Taylor
