

CONTENTS**Features**

244

Viewpoint: In defense of private property

U.S. Senator Steve Symms discusses increasing government regulation of private property

245

STEER: A regional model for environmental research and education

E. L. Michalson and R. I. Papendick summarize results of this program designed to develop soil erosion control strategies and practices for the three Pacific Northwest states

251

What sustainable agriculture means for fish and wildlife

Laurence R. Jahn and Eric W. Schenck outline how provisions in the 1985 and 1990 farm bills that stress sustainable farming practices will benefit wildlife

256

Land degradation in Australia: The search for a legal remedy

J. W. Looney analyzes Australia's approach to encouraging land stewardship—penalties and fines rather than incentives

260

Computer-aided conservation planning for the 1985 Food Security Act

M. J. Monson and Nyle Wollenhaupt describe a computer program designed to assure consistency among USLE determinations for farmers

263

A statewide LESA system for Hawaii

Carol A. Ferguson, Richard L. Bowen, and M. Akram Kahn look at Hawaii's statewide LESA system, the first areawide system of its kind

268

Cumulative effects: A broader approach to water quality research

Roy C. Sidle and James W. Hornbeck call for a new, long-range approach to research to study the cumulative effects of watershed pollution

272

The Arkansas response to federal farm program opportunities

Joseph D. Long, Don Akers, and Steve N. Wilson relate how Arkansas has taken advantage of the 1985 and 1990 farm bills to enhance wildlife habitat

Commentary

276

Irrigation-induced water quality problems: Can present agencies cope?

Janne Hukkinen looks at how western irrigation agencies are dealing with contamination of drainage water

Research reports

293

Use of the global positioning system in soil survey

D. S. Long, S. D. DeGloria, and J. M. Galbraith

298

Phosphorus and potassium stratification in conservation tillage systems

Susan G. Robbins and Regis D. Voss

301

An operational model for targeting erosion remediation on the basis of partial off-site damage assessments

Robert D. Macgregor, Judith A. Maxwell, and Fred J. Hitzhusen

304

A simple, inexpensive device for measuring shallow groundwater levels

Robert J. Henszey

306

Factors associated with loblolly pine mortality on former agricultural sites in the Conservation Reserve Program

R. J. Mitchell, G. B. Runion, W. D. Kelley, D. H. Gjerstad, and C. H. Brewer

311

Temporal trends in fluvial-sediment discharge in Ohio, 1950-1987

S. M. Hindall

314

A survey of lignin, cellulose, and acid detergent fiber ash contents of several plants and implications for wind erosion control

J. D. Bilbro, D. J. Undersander, D. W. Fryrear, and C. M. Lester
