Viewpoint:
Environmental extension: A key to nonpoint-source pollution abatement
David B. Baker suggests that a systematic environmental extension program needs to be mounted in each state to deal with nonpoint-source pollution problems

10
SWCS in Washington
Norman A. Berg discusses the Society's role in the nation's capital and the work he has done over the past six years as SWCS's representative there

12
Pollution control in the Great Lakes Basin: An international effort
Gregory J. Wall, Terry J. Logan, and Jennifer L. Ballantine look at the history and future of joint efforts between the United States and Canada to monitor and alleviate water quality problems in the five Great Lakes

16
Rural Clean Water: Annie-Fanny-Mike and the Dunsmore Proposition
Charles E. Little, in his continuing series on the Rural Clean Water Program, takes a look at how some Vermont farmers laid to rest the idea that good farming practices, environmental quality, and sound agricultural economics are independent

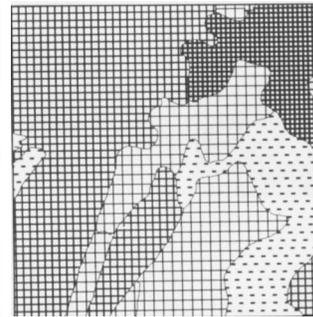

20
Nitrate movement to groundwater in the southeastern Coastal Plain
R. K. Hubbard and J. M. Sheridan summarize what researchers have learned about water movement to aquifers and how that knowledge can be put to use in combating nitrate contamination of groundwater

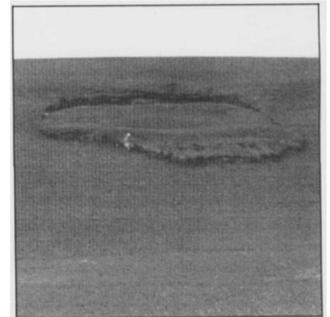

28
Soil geographic data bases
William U. Reybold and Gale W. TeSelle describe three new computerized data bases that will allow users to integrate soils information with other data in geographic information systems

30
Small-scale digital soil maps for interpreting natural resources
Norman B. Bliss and William U. Reybold outline how maps generated from new soil data bases can be used for natural resource planning on regional, state, or multistate levels

35
Economic damage from soil erosion
Daniel Colacicco, Tim Osborn, and Klaus Alt, using data from the 1982 National Resources Inventory and the EPIC model, offer some improved estimates of the on-farm and off-farm damages caused by soil erosion

40
The economic efficiency of voluntary soil conservation programs
Marc O. Ribaud, Daniel Colacicco, Alex Barbarika, and C. Edwin Young assess the costs and benefits of federal, nontargeted soil and water conservation programs and raise questions about the assumption that soil conservation is desirable wherever it occurs and at whatever the cost

Commentary

44
Conservation compliance and wildlife
Ann Y. Robinson analyzes the wildlife habitat improvements that might be achieved under the conservation compliance provisions in the Food Security Act of 1985

Journal of Soil & Water Conservation

To advance the science and art of good land and water use worldwide

Research Reports

57
Economically sustainable crop production with legume cover crops and conservation tillage
W. W. Frye and R. L. Blevins

60
Enrollment in Minnesota's RIM reserve program
Philip Heywood and Terence Cooper

64
Benefits and costs of agricultural nonpoint-source pollution controls: The case of St. Albans Bay
C. Edwin Young and James S. Shortle

67
Effects of animal waste control practices on nonpoint-source phosphorus loading in the West Branch of the Delaware River watershed
Mark P. Brown, Patricia Longabucco, Michael R. Rafferty, Paul D. Robillard, Michael F. Walter, and Douglas A. Haith

70
Measuring particulate pollution damage from wind erosion in the western United States
Steven Piper

75
Potential demand for supplemental irrigation in the Lower Mississippi Valley
Steven A. Henning

79
Coal mine reclamation with grasses and legumes in southern Illinois
W. Clark Ashby, Kevin P. Hannigan, and David A. Kost

83
A bioeconomic approach to estimating the economic effects of watershed disturbance on recreational and commercial fisheries
John B. Loomis

87
Infiltration, water repellency, and soil moisture content after broadcast burning a forest site in southwest Oregon
D. H. McNabb, F. Gaweda, and H. A. Froehlich

91
Soil diversity and the effects of field eligibility rules in implementing soil conservation programs targeted to highly erodible land
Merritt Padgett

Cover: The protection of water quality, be it surface water or groundwater supplies, is fast becoming the prominent natural resource management issue in many regions of the world and likely will become the focal point in the next round of important environmental legislation that is debated and enacted in many countries. Soil Conservation Service photo by Ron Nichols.

Journal of Soil and Water Conservation (ISSN 0022-4561) is published six times a year in January, March, May, July, September, and November by the Soil and Water Conservation Society, 7515 N.E. Ankeny Road, Ankeny, Iowa 50021-9764. Second class postage paid at Ankeny, Iowa, and additional mailing offices.

POSTMASTER: Send address changes to *Journal of Soil and Water Conservation*, 7515 N.E. Ankeny Road, Ankeny, Iowa 50021-9764.
