

CONTENTS**Features****182
Viewpoint: Alternative conservation systems are working**

Wilson Scaling contends that alternative conservation systems offer flexible, sensible choices for producers

**184
Agriculture versus the environment: Communicating perspectives**

Jeffrey A. Zinn and John E. Blodgett analyze the environmental agendas of agricultural and environmental groups in search for some common ground

**188
Environmental education: A movement in transition**

John F. Disinger says the key to environmental education today is working cooperatively with teachers and the educational system

**192
Gypsum blocks "tell a water tale"**

Gail Richardson, John Tiedeman, Keith Crabtree, and Katy Summ tell how California farmers are saving money and increasing yields by carefully monitoring irrigation with gypsum blocks

**196
What use prairie potholes?**

J. L. Richardson and J. L. Arndt look at hydrologic and soil factors that come into play in determining the uses of wetlands in the prairie pothole region

199**Rural clean water: The economy of rain and the Tillamook Imperative**

Charles E. Little concludes his series on the Rural Clean Water Program with a look at how dairymen are cleaning up their act along the Oregon coast

203**Benefit and cost insights from the Rural Clean Water Program**

Steven Piper, C. Edwin Young, and Richard Magleby offer a preliminary economic analysis of the 20 active RCWP projects

209**State regulation of soil erosion**

SWCS's Wisconsin Chapter presents some concepts on state erosion control programs

Commentary**212****Improving agricultural development assistance**

C. F. Bentley suggests ways to overcome obstacles to better development assistance programs

Research Reports**225****Runoff and soil loss by crop growth stage under three cotton tillage systems**

K. H. Yoo and J. T. Touchton

228**Evaluation of sixteen fall-seeded cultivars for controlling wind erosion**

J. D. Bilbro

232**Using soil surveys to delineate stratified drift deposits for groundwater protection**

Arthur J. Gold, Saiping Tso, Peter V. August, and William R. Wright

234**An economic risk analysis of conservation tillage systems for wheat, grain sorghum, and soybeans in the Great Plains**

Jeffery R. Williams, Richard V. Llewellyn, and Chris L. Mikesell

240**Water and nitrate movement in earthworm burrows within long-term no-till cornfields**

W. M. Edwards, M. J. Shipitalo, L. B. Owens, and L. D. Norton

243**Dry matter growth performance of red clover and Italian ryegrass as cover crops spring-seeded into fall-seeded winter rye in relation to soil physical characteristics**

Linnell M. Edwards

247**Tillage effects on phosphorus losses from sludge-amended soils**

M. M. Deizman, S. Mostaghimi, T. A. Dillaha, and C. D. Heatwole

251**The impact of rural water districts on the conversion of agricultural land in Douglas County, Kansas**

Donna Luckey

Address all editorial and business correspondence to SWCS, 7515 N.E. Ankeny Road, Ankeny, Iowa 50021-9764; telephone (515) 289-2331. Subscription is by membership in SWCS or by subscription. Membership dues are \$37 a year (\$42 outside the U.S. and Canada); subscriptions are \$30 a year (\$35 outside the U.S. and Canada).

The Soil and Water Conservation Society is a multidisciplinary organization dedicated to promoting the science and art of good land and water use worldwide, with emphasis on the conservation of soil, water, and related natural resources, including all forms of beneficial plant and animal life. To this end, SWCS seeks through the *Journal of Soil and Water Conservation* and other programs to emphasize the interdependence of natural resources and thereby to educate people so that they can use and enjoy these resources forever.
