

CONTENTS**Features****195****Viewpoint: Big Hugh's message: One-man's task!**

Wheeler McMillen recalls a fundamental tenet of the gospel, according to Hugh Hammond Bennett

196**Nonpoint-source pollution control: A resource conservation perspective**

W. G. Knisel, R. A. Leonard, and E. B. Oswald explore the conflicts that seemingly exist between water pollution control and soil and water conservation efforts

200**Soil conservation and Extension in Missouri: A study of conflict**

Michael K. Childs and J. C. Headley examine the sources and consequences of dissension in the evolution of a state's soil conservation programs and institutions

204**What's in a soil survey for me?**

James R. Lukens presents a farmer's view of the value of soil survey information

**207****Managing water quality in channel catfish ponds**

Claude E. Boyd outlines the management procedures for maintaining water quality in catfish production

210**A "new" case for differential assessment of prime farmlands**

Shelley M. Mark proposes a restructuring of tax policy to promote protection and more orderly development of agricultural lands

213**Commentary: RCA: No federalism is new federalism**

Ken Cook previews the U.S. Department of Agriculture's new program in soil and water conservation

214**Commentary: Hard rain's gonna fall! On selling conservation in Woodbury County, Iowa**

John Walter looks at the realities of dealing with farmers on erosion control matters

216**Commentary: Great Plains study suspended****Departments****194****Pen points****218****In the news****222****Upcoming****223****Books, etc.****Research reports****225****A technique for measuring soil crust strengths**

Gary D. Brossman, James J. Vorst, and Gary C. Steinhardt

226**Renovating mountain hay meadows: An economic analysis**

James J. Jacobs

229**Soil variability and fertility considerations affecting establishment of erosion control vegetation on Piedmont roadcuts**

D. L. Hargett, J. A. Phillips, and H. J. Kleiss

233**Evapotranspiration from riparian vegetation: Water relations and irrecoverable losses for saltcedar**

David C. Davenport, Paul E. Martin, and Robert M. Hagan

237**Evapotranspiration from riparian vegetation: Conserving water by reducing saltcedar transpiration**

David C. Davenport, Paul E. Martin, and Robert M. Hagan
