

**CONTENTS****Features****284****Viewpoint: A real estate tax levy for soil and water conservation**

Roy M. Kottman proposes that counties tax real estate to raise funds for essential conservation work

**286****Soils, society, and sustainability**

William K. Reilly argues for a reorientation of policy to sustain progress in soil and water conservation

**291****The dilemma of conservation**

Floyd E. Heft uses conservation's successes and failures of the past 50 years as a basis for looking ahead 50 years

**294****Alternative agriculture**

Robert Rodale suggests that SCSA initiate a merger of conservation and agriculture into regenerative production systems

**297****Aerial photography for conservation information and education**

W. E. Wildman explains the use of 35mm, low-level aerial photography to portray conservation problems

**300****Soil handling for surface mine reclamation**

Norman E. Hargis and Edward F. Redente review research on soil handling to achieve successful reclamation of mined land in the western United States

**306****Soil conservation in China's Loess Plateau**

Lee Hsiao-tseng describes attempts to deal with erosion in a region having some of the world's most erodible soils

**308****Commentary: Who should pay how much for soil and water conservation?**

Wesley D. Seitz suggests that the democratic process remains the best means of resolving the question of who should pay what for conservation

**Departments****282****Pen points****310****In the news****314****Upcoming****316****Books, etc.****344****The SCSA view****Research reports****317****Enhancement of riparian vegetation following shrub control in Arizona chaparral**

L. F. DeBano, J. J. Brejda, and J. H. Brock

**320****Coordinated farm and research management (COFARM) data system for soils and crops**

M. J. Shaffer, J. B. Swan, and M. R. Johnson

**324****Conservation tillage practices for winter wheat production in the Appalachian Piedmont**

W. L. Hargrove and W. S. Hardcastle

**327****Wildlife use of no-till and conventionally tilled corn fields**

D. B. Warburton and W. D. Klimstra

**330****Erosion from simulated rainfall on mountain rangeland in Utah**

Geroge E. Hart

**334****Soil degradation and land use changes: A representative-farm analysis**

Steven E. Kraft and Thomas L. Toohill

**339****Windbreak economics: The case of winter wheat production in eastern Nebraska**

James R. Brandle, Bruce B. Johnson, and Dave D. Dearmont

**Cover:** Buring of corn stubble on a calm day in Sutter County, California, resulted in the smoke rising and creating its own cumulus cloud (see page 297). Photo by W. E. Wildman, Cooperative Extension, University of California, Davis.
