Features

202 Viewpoint: A new environmental safeguard for pesticides
Duane Sand proposes an environmental risk-rating to aid purchasers of agricultural chemicals

204 Soil conservation in Canada
J. Dumanski, D. R. Coote, G. Luciuk, and C. Lok look at reasons for the recent upswing in public concern about land quality

211 The future for multiple use of land in the South
John Fedkiw assesses the prospects for landowner investment in multiple-use management

215 Nonpoint-source pollution: Are cropland controls the answer?
Leonard P. Gianessi, Henry M. Peskin, Pierre Crosson, and Cyndi Puffer suggest that soil erosion control on cropland may, in some regions, have limited impact on water quality improvement

219 Swampbusting in perspective
Ralph E. Heimlich and Linda L. Langner look at the causes of wetland drainage and what effect new farm bill provisions might have on this land conversion process

225 Soil conservation and tax policy
William D. Anderson and Nelson L. Bills discuss what tax reform may mean for land owners and operators who invest in conservation

229 Saving urban irrigation water
Barton E. Ambrose describes a plan for water conservation in urban areas of the Southwest

231 Constructing a national, rural land transfer database
Harvey M. Jacobs and D. David Moyer discuss the importance of creating an information system on land transfers

235 Commentary: The big seep
Ken Cook investigates, through the eyes of detective Nick Nepa, pesticide contamination of groundwater

238 Commentary: Coherent farm conservation policy, at last
Thomas A. Hurford urges government officials not to waiver in their implementation of the conservation title in the 1985 farm bill
