

CONTENTS**Features****302****Viewpoint: Changing values in public land management**

Dale Robertson urges natural resource managers to be more creative and adaptable in responding to the growing variety of demands on the public lands

304**Soil conservationists and the uses of law**

Charles F. Wilkinson pleads with soil conservationists to remember what they are trying to save and use the law to that end

312**Tomorrow's water manager**

Christine Olsenius offers a planning guide for the new breed of water managers

**316****The restructuring of agriculture and forestry**

R. Neil Sampson looks at the potential impacts of an increasing bipolar structure in these two industries

321**Revitalizing rural America**

Marty Strange presents three principles to guide debates about farm and rural development policy

325**Targeting to protect groundwater quality**

A. M. Duda and R. J. Johnson outline why the Clean Water Act may be a suitable vehicle around which to integrate the programs necessary to protect groundwater quality

Commentary**331****Resource conservation: Credit where credit's due**

Ken Cook suggests that a land stewardship commitment be tied to the pending bailout of the Farm Credit System

333**How to deal with groundwater contamination?**

Lawrence Mosher says that vague, arbitrary standard-setting procedures and a lack of information on contamination levels and the risks involved are impeding groundwater protection efforts

335**Waterbusting: Irrigation investment aggravates commodity surpluses**

Melvin L. Cotner examines a continuing inconsistency between federal farm commodity and conservation programs

Research reports**349****Soil erosion and water treatment costs**

D. Lynn Forster, Chris P. Bardos, and Douglas D. Southgate

352**Intensive cropping sequences to sustain conservation tillage for erosion control**

G. W. Langdale and R. L. Wilson, Jr.

356**Integrating soil conservation practices into farmland leasing arrangements**

Donn A. Derr

358**Species selection for revegetating sand and gravel mines in the Northeast**

F. B. Gaffney and J. A. Dickerson

361**Fertilization for forage production on calcareous mined land in Ohio**

Paul Sutton and George F. Hall

364**Straw burning reduces infiltration in winter wheat**

James Steichen, Mark Hooker, and D. Michael Powell

367**Factors related to adoption of soil conservation practices in the Dominican Republic**

David O. Hansen, J. Mark Erbaugh, and Ted L. Napier

370**Fisheries in man-made pools below grade-control structures and in naturally occurring scour holes of unstable streams**

C. M. Cooper and S. S. Knight

373**Influences of site preparation on forest soil chemical properties in the Southern Coastal Plain**

J. Melinda Slay, B. G. Lockaby, J. C. Adams, and C. G. Vidrine
