CONTENTS

Features

8 Viewpoint: The Food Security Act: A redefinition of conservation
Max Schnepf sets the context for this JSWC issue, based largely on material from the "American Agriculture at the Crossroads" conference

10 Conservation at the crossroads
Peter C. Myers examines the change brought about by the linkage of conservation and agricultural policy goals in the 1985 Food Security Act

CONSERVATION RESERVE

14 Implementing CRP: Progress and prospects
By Milton Hertz

16 Implementing CRP: A state/local perspective
By Greg Larson

18 Implementing CRP: A private perspective
By Dean Kleckner

20 Implementing CRP: A conservation organization view
By Ralph Grossi

CONSERVATION COMPLIANCE AND SODBUSTER

22 Implementing conservation compliance and sodbuster: A federal view
By Wilson Scaling

24 Implementing conservation compliance and sodbuster: A state and local view
By Ray Ledgerwood

26 Implementing conservation compliance and sodbuster: A private view
By Myrl D. Mitchell

SWAMPBUSTER AND CONSERVATION EASEMENTS

27 Implementing swampluster: Two years of progress
By Gary A. Margheim

30 Implementing swampluster: A view
By Lloyd A. Jones

31 Implementing conservation easements
By Vance L. Clark

32 Implementing conservation easements: A view
By Duane Sand

33 Implementing swampluster and conservation easements: An Ohio perspective
By David L. Risley and Michael J. Budzik

WHAT SOIL LOSS STANDARD?

35 First principles: The definition of highly erodible land and tolerable soil loss
By Charles M. Benbrook

38 Applying a soil loss standard on the farm
By Martin W. Burch

CONSERVATION PLANNING

40 The changing nature of conservation planning
By Sherman L. Lewis

43 Conservation planning: A state perspective
By Gale Martin

44 Conservation planning: A local perspective
By Clarence Durban

47 Conservation planning by hydrologic units
By Leroy Holtzclaw

INFORMATION AND EDUCATION

49 Meeting the information and education challenge
By Myron D. Johnsrud

51 Information and education: Demand versus supply
By Peter J. Nowak

MONITORING AND EVALUATION

54 Monitoring the Conservation Title
By Kenneth A. Cook

57 Monitoring the Conservation Title: A congressional perspective
By Jeffrey A. Zinn

To advance the science and art of good land and water use worldwide

59  Monitoring the economic impacts of the conservation reserve  
   By John A. Miranowski

60  Tree planting on CRP acres in the South  
   By Robert J. Lentz

65  Regulating water quality: A farmer’s perspective  
   By Will Erwin

66  Conservation reserve tree planting: Can we improve upon success?  
   By Allan J. West

67  The potential for wildlife habitat improvements  
   By Laurence R. Jahn

70  Conservation Title impacts on producers  
   By Kenneth Bader

72  Conservation Title impacts on agribusiness  
   By J. M. Johansen

73  Social impacts of the Conservation Title  
   By Marty Strange

76  A Canadian perspective on the Food Security Act  
   J. Dumanski, A. L. Birch, L. B. Chambers, R. C. Cormier, and D. R. Cressman  
   analyze what Canadians may learn from the U.S. experience with the 1985 Food Security Act

78  Expanding the conservation reserve to achieve multiple environmental goals  
   Clayton W. Ogg, John E. Hostetler, and Donna J. Lee  
   suggest that the Conservation Reserve Program might be used to help solve resource management problems beyond soil erosion control

82  Minnesota’s RIM reserve: How does it stack up against CRP?  
   Steven J. Taff contrasts the federal conservation reserve with Minnesota’s RIM reserve

85  The unfulfilled promise of the 1985 Food Security Act  
   Stephen B. Lovejoy says the Conservation Title of the 1985 Food Security Act has the potential for dealing with water quality problems heretofore not addressed in federal legislation

86  Multiyear set-asides: Promoting consistency in land use policies  
   W. G. Boggess and Michael R. Dicks argue that a multiyear set-aside program can solve problems not addressed by annual set-asides or the Conservation Reserve Program

99  A dual targeting criterion for soil conservation programs in Minnesota  

103  A new approach to marginal agricultural land classification  
   G. A. Larson, G. Roloff, and W. E. Larson

106  Extending the conservation reserve: What effect on commodity prices and budget costs?  
   Thomas W. Hertel and Paul V. Preckel

108  Using CREAMS to simulate filter strip effectiveness in erosion control  
   Robert D. Williams and Arlin D. Nicks
