## Features

**120**
**Viewpoint: Can the National Park Service cope?**
Paul C. Pritchard asks whether this venerable federal agency can extract itself from a web of problems that include insufficient personnel, inadequate budgets, and conflicting policies.

**122**
**What place for the grizzly?**
Stan Tixier tells about the efforts of an interagency committee to save the remnant populations of grizzly bears in the lower 48 states.

**126**
**Extension’s role in soil and water conservation**
Dana Hoag, Stephen Lilley, Mike Smolen, Maurice Cook, and Joan Wright look at how the Cooperative Extension Service is trying to educate farm and nonfarm audiences about soil and water conservation issues.

**133**
**Is short-duration grazing the answer?**
R. D. Pieper and R. K. Heitschmidt review basic grazing management principles and assess the potential of short-duration grazing systems.

**138**
**Coordinated resource management: A planning process that works**
C. Rex Cleary provides a case history of one resource management planning approach in Nevada that worked.

**130**
**Tillage committees: A local approach to effective extension education**
J. W. Bauder and J. S. Hickman explain why grassroots programs aimed at getting producers to adopt conservation tillage practices are so successful.

**145**
**Educational and institutional needs of the Conservation Title**
Richard L. Farnsworth and John B. Braden examine the new roles that resource agencies must assume if the various conservation provisions of the Food Security Act of 1985 are to be successful in the long term.

**140**
**Tennessee’s Copper Basin: A case for preserving an abused landscape**
M.-L. Quinn reviews the historical significance of the region’s bare, red hills and builds a unique case for their preservation.

**148**
**Conservation policy insights for the future**
Michael R. Dicks and Anthony Grano discuss how the performance of the Conservation Title in the Food Security Act of 1985 can be used to refine or formulate new conservation strategies.
### Commentary

Cataloging experiences:
The USDA approach

**152** Reporting progress:
The USDA approach to soil and water conservation
Jeffrey A. Zinn critiques the fourth annual RCA progress report summarizing the status of the national soil and water conservation program

155 Reporting progress:
The annual report of the Forest Service
Ross W. Gorte discusses the strengths and weaknesses of the Forest Service's annual report required by the National Forest Management Act of 1976

### Agroforestry's coming of age
Frederick Steiner explains why the concept of agroforestry has become something of a buzzword in global natural resource programs

### Research Reports

171 Toward a general method of estimating productivity-soil depth response relationships
Lee A. Christensen and David E. McElveen

177 Highly erodible land: Farmer perceptions versus actual measurements
Douglas A. Osterman and Theresa L. Hicks

182 Public perceptions of how farmers treat the soil
Joseph J. Molnar and Patricia A. Duffy

186 Attitudes toward a proposed soil conservation program
Ted L. Napier and Silvana M. Camboni

191 A user's guide for estimating allowable use of tracked vehicles on nonwooded military training lands
Victor E. Diersing, Robert B. Shaw, Steven D. Warren, and Edward W. Novak

195 Erosion and deposition in a field/forest system estimated using cesium-137 activity
Richard Lowrance, Sherwood McIntrye, and Clarence Lance

199 Reporting progress:
The annual report of the Forest Service
Ross W. Gorte discusses the strengths and weaknesses of the Forest Service's annual report required by the National Forest Management Act of 1976

157 Agroforestry's coming of age
Frederick Steiner explains why the concept of agroforestry has become something of a buzzword in global natural resource programs
