Features

358 Viewpoint: Conservation programs: Mandatory or voluntary? Dean Kleckner raises questions about introducing a "social agenda" into farm programs.

360 The complete resource professional Robert W. Teater spells out the key attributes of a true conservation professional.

363 Reassessing environmental limits and realities Ken Kowalski looks at Canada's efforts to restore environmental integrity.

368 The great Alaskan land subdivision revisited Thomas J. Gallagher and Alan C. Epps review the complexities of implementing multiple-use land management plans in Alaska.

379 Agribusiness and the CRP Gary Devino, Donald Van Dyne, and Curtis Brashier analyze what impacts the Conservation Reserve Program may have on one segment of rural economies.

381 Socioeconomics of soil conservation in developing countries Michael Stocking reminds us that soil conservation in developing countries is a minefield for the unwise.

386 Rural clean water: The Okeechobee story Charles E. Little reports on a successful pollution abatement effort in Florida.

391 The Little Lost River flood control plan: A case history Mike W. Anderson tells how the collective action by an Idaho community resolved a recurring flood problem.

Research Reports

407 Management effects on runoff, soil, and nutrient losses from highly erodible soils in the Southern Plains W. A. Berg, S. J. Smith, and G. A. Coleman

411 Farmland protection in Washington State: An analysis Gary R. Christensen, William W. Budd, John P. Reganold, and Frederick R. Steiner

418 Soil loss, agriculture, and conservation in Rwanda: Toward sound strategies for soil management Laurence A. Lewis, Daniel C. Clay, and Yvan M. J. Dejaegher

Commentary

394 Professional integrity and practical politics Joseph W. Haas says that many conservationists will likely resist influences that might compromise their professional integrity on soil erosion control standards.

396 Hill Country transition: A Texas frontier succumbs to the tenderfeet J. C. Doherty reports on a frontier long gone in south central Texas

421 Quantifying organic matter degradation in agricultural fields using PC-based image analysis H. Schreier, R. Wart, and S. Smith

425 Use of thematic mapper digital data for updating the New Jersey land cover component of the 1987 National Resources Inventory Teuvo M. Airola and Joanne Vogel

428 Irrigation strategy selection based on crop yield, water, and energy use relationships: A Michigan example K. A. Algozin, V. F. Bralts, and J. T. Ritchie
