Wilson Scaling contends sensible choices for systems offer flexible, that alternative conservation are working conservation systems are working Wilson Scaling contends that alternative conservation systems offer flexible, sensible choices for producers.

Agriculture versus the environment: Communicating perspectives Jeffrey A. Zinn and John E. Blodgett analyze the environmental agendas of agricultural and environmental groups in search for some common ground.

Environmental education: A movement in transition John F. Disinger says the key to environmental education today is working cooperatively with teachers and the educational system.

Gypsum blocks "tell a water tale" Gail Richardson, John Tiedeman, Keith Crabtree, and Katy Summ tell how California farmers are saving money and increasing yields by carefully monitoring irrigation with gypsum blocks.

What use prairie potholes? J. L. Richardson and J. L. Arndt look at hydrologic and soil factors that come into play in determining the uses of wetlands in the prairie pothole region.

Rural clean water: The economy of rain and the Tillamook Imperative Charles E. Little concludes his series on the Rural Clean Water Program with a look at how dairymen are cleaning up their act along the Oregon coast.

Benefit and cost insights from the Rural Clean Water Program Steven Piper, C. Edwin Young, and Richard Magleby offer a preliminary economic analysis of the 20 active RCWP projects.

State regulation of soil erosion SWCS's Wisconsin Chapter presents some concepts on state erosion control programs.

Improving agricultural development assistance C. F. Bentley suggests ways to overcome obstacles to better development assistance programs.

Runoff and soil loss from fall-seeded cultivars for controlling wind erosion J. D. Bilbro

Using soil surveys to delineate stratified drift deposits for groundwater protection Arthur J. Gold, Saiping Tso, Peter V. August, and William R. Wright

An economic risk analysis of conservation tillage systems for wheat, grain sorghum, and soybeans in the Great Plains Jeffery R. Williams, Richard V. Llewelyn, and Chris L. Mikeseal

Dry matter growth performance of red clover and Italian ryegrass as cover crops spring-seeded into fall-seeded winter rye in relation to soil physical characteristics Linnell M. Edwards

Tillage effects on phosphorus losses from sludge-amended soils M. M. Deizmann, S. Mostaghimi, T. A. Dillaha, and C. D. Heatwole

The impact of rural water districts on the conversion of agricultural land in Douglas County, Kansas Donna Luckey

In our defense, we can point to some
david r. cressman, president

the soil and water conservation society

the soil and water conservation society

is a multidisciplinary organization
dedicated to promoting the science and
art of good land and water use
worldwide, with emphasis on the
conservation of soil, water, and related
natural resources, including all forms of
beneficial plant and animal life. to this
end, swcs seeks through the journal of
soil and water conservation and other
programs to emphasize the
interdependence of natural resources and
thereby to educate people so that they
can use and enjoy these resources
forever.
