

**CONTENTS****Features**

164

**Viewpoint: Sustainable agricultural resources: The role of land-grant universities**

Dennis Keeney says public universities and their extension services must take the lead in developing forward-thinking programs combining land stewardship and profitability

165

**Fundamental fallacies of building agricultural sustainability**

Frederick Kirschenmann reflects on agriculture at a crossroads—an agricultural system based on industry or on nature

169

**A cooperative educational program to reduce soil erosion**

David P. Shelton, Elbert C. Dickey, Paul J. Jasa, David A. Biere, and Susan Smydra Krotz describe educational tools and financial incentives used in the Logan Creek Special Study area in eastern Nebraska

174

**Wetlands, drainage ditches, and the Clean Water Act**

Benjamin H. Grumbles analyzes the complex regulations and policies that affect alterations of drainage ditches under the Clean Water Act's Section 404 permit process

178

**Strategic planning for a comprehensive water plan**

Gunnar Isberg looks at a unique water management plan in Olmsted County, Minnesota, that seeks to prevent groundwater contamination rather than clean it up after the fact

184

**Agricultural research to improve water quality**

Charles A. Onstad, Michael R. Burkhart, and Gary D. Bubenzer summarize the new cooperative effort to evaluate farming practices and research needed to prevent or mitigate contamination of water sources by agricultural chemicals

189

**Facing environmental challenges: Programs for farmers**

A. Ann Sorenson and James W. Porterfield relate experiences that the American Farm Bureau Federation has had with farmer and public awareness programs

**Commentary**

192

**A new way with wetlands**

William K. Reilly outlines what the Environmental Protection Agency is doing to meet the Bush Administration's goal of no net loss of wetlands

194

**Soil and water conservation in a landscape perspective**

Leslie Sauer says natural resource managers should be aware of the impacts that soil and water management programs have on landscape values

**Research reports**

211

**Erosion, sediment, and economic effects of conservation compliance in an agricultural watershed**

Tony Prato and Shunxiang Wu

215

**Soil conservation behavior and attitudes among Ontario farmers toward alternative government policy responses**

Scott N. Duff, D. Peter Stonehouse, Stewart G. Hilts, and Donald J. Blackburn

220

**Perceptions of conservation compliance among farmers in a highly erodible area of Ohio**

Ted L. Napier and Anthony S. Napier

225

**Windbreak species performance and management practices as reported by Montana and North Dakota landowners**

Gerald A. Tuskan and Kevin Laughlin

229

**Alfalfa and the nitrogen cycle in the Corn Belt**

Todd Andrews Peterson and Michael P. Russelle
