

CONTENTS**Features****6
Viewpoint: A soil health index**

John Haberern says we must look beyond the idea of sustainability and seek to regenerate the soil's vitality

**8
Erosion and soil productivity in Asia**

H. E. Dregne offers an assessment of how soil erosion has reduced soil productivity throughout much of Asia

**14
Why farmers adopt production technology**

Pete Nowak looks at some basic reasons inhibiting farmers from adopting new crop residue management technology and offers remedial strategies

**17
What biotechnology means for soil and water conservation**

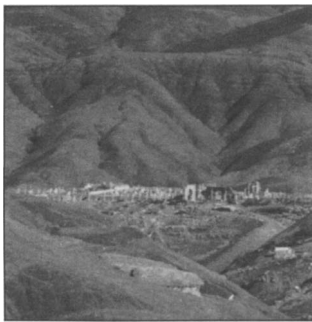

L. F. Elliott and R. E. Wildung outline the possibilities for using innovative biological manipulation, in conjunction with sound management practices, in the battle against soil erosion

**21
The changing context of conservation district activity: A view from Missouri**

J. Sanford Rikoon, Jere Giles, and Ernest Perry report on a study of how district employees and supervisors look at the role of conservation districts in dealing with present and future natural resource management priorities

**28
What capacity the land?**

William W. Budd reviews the evolution of the concept of carrying capacity

**32
Planning the use of land for the 21st century**

Harvey M. Jacobs looks at emerging trends and challenges in land use planning

**35
Designing with the land**

Anne Whiston Spirn says it is time for those who care about the use of land to embrace the city as well as the countryside

**39
Green the Earth, heal the Earth**

Ian L. McHarg asks whether mankind is ready to place the world's environmental problems at the top of the political agenda

**42
Options for agricultural nonpoint-source pollution control**

Marc O. Ribaldo explains why current federal conservation programs offer varying potential for improving water quality

**47
Water table management in the Eastern Coastal Plain**

K. C. Stone, R. C. Sommers, G. H. Williams, and D. E. Hawkins review the possible applications of water table management in this region

**52
Water table management for field-sized areas in the Atlantic Coastal Plain**

Adel Shirmohammadi, C. R. Camp, and D. L. Thomas look at the growing use of water table management by farmers in the southeastern United States

**58
Water table management on a watershed scale**

R. O. Evans, J. E. Parsons, K. C. Stone, and W. B. Wells report on the use and effectiveness of larger structures for water table management

**65
Water table management for water quality improvement**

D. L. Thomas, P. G. Hunt, and J. W. Gilliam identify the benefits that water table management can have for water pollution control efforts

**71
Soil and crop management aspects of water table control practices**

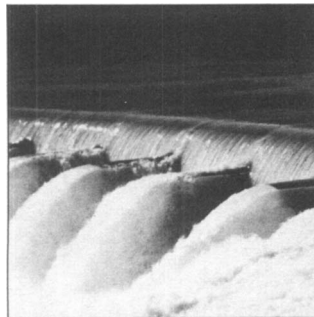

W. J. Busscher, E. J. Sadler, and F. S. Wright review how various soils and crops respond to water table management

Commentary

75

Needed: A comprehensive U.S. water policy

Senator Mark O. Hatfield urges authorization of a national commission to review water resource problems and make recommendations to the president

76

Toward a workable policy for freshwater wetlands

Gerald F. Vaughn puts forth three principles that he believes can move the United States closer to resolving wetland protection issues

Research reports

97

Soil erosion rates in India

Gurmel Singh, Ram Babu, Pratap Narain, L. S. Bhushan, and I. P. Abrol

100

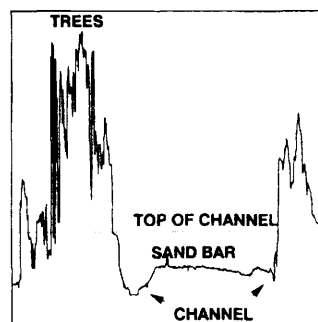

Sustainable agriculture research in the ideal and in the field

Molly D. Anderson and William Lockeretz

104

Airborne laser: A tool to study landscape surface features

J. C. Ritchie, T. J. Jackson, J. H. Everitt, D. E. Escobar, J. B. Murphey, and E. H. Grissinger

107

Size characteristics of sediment from agricultural soils

L. D. Meyer, D. E. Line, and W. C. Harmon

112

Benefits of wheat stubble strips for conserving snow in southwestern Saskatchewan

C. A. Campbell, B. G. McConkey, R. P. Zentner, F. Selles, and F. B. Dyck

116

Estimation of stocking rate on New Mexico rangelands

Jerry L. Holechek and Rex D. Pieper
