206

Viewpoint: Real-world solutions

R. D. Plowman suggests that agricultural research focus on creating technologies that make sense both environmentally and economically

207

Agriculture and the Everglades

J. A. Stone and D. E. Legg trace agriculture's relationship to the Everglades and examine how Floridians are moving to protect and restore this resource while maintaining agricultural production

216

The status of North Dakota wetlands

Jay A. Leitch and James F. Baltezare report on a study of wetland protection in this Prairie Pothole state and look at the issues surrounding wetlands

220

Water quality and agriculture: Mississippi experiences

Charles M. Cooper and William M. Lipe review research in the southern United States that helps to resolve basic agricultural problems

224

High-stature grasses for winter grazing

Mark E. Majerus looks at newly introduced cultivars of basin wildrye that are being used for forage in Wyoming and Montana

226

Teaching land management with a microcomputer-based model

Dan Ross, Tom Nash, and Jon Harbor tell how two universities in Ohio have developed a computer-based version of the universal soil loss equation to help students understand application of the equation

231

Teamwork for conservation education

Thomas J. Hoban, IV, identifies six steps resource professionals can use to develop conservation education campaigns

Commentary

234

Using expert systems and process models to enhance U.S. agriculture

V. W. Benson, B. L. Harris, C. W. Richardson, C. A. Jones, and J. R. Williams say the key to effective expert systems and process models is continuous development of those models through user input

Personal enrichment

236

Generating organizational trust and credibility

C. Paul Barlow looks at how trust can be cultivated by organizational managers

Research reports

257

Use of conservation tillage to retard erosive effects of large storms

G. W. Langdale, W. C. Mills, and A. W. Thomas

260

Water quality, cost-sharing, and technical assistance:

Perceptions of Maryland farmers
Erik Lichtenberg and Billy V. Lessley

264

Budgetary and farm-sector impacts of the 1985-1990 Conservation Reserve Program

Alex Barbarika, Jr. and Jim Langley

268

Use of forest soils information by New Hampshire foresters

Donald G. Hodges, Victoria N. Parmele, A. E. Luloff, and C. T. Smith, Jr.

271

Use of a geographic information system for selection of sites for land application of sewage waste

William G. Hendrix and David J.A. Buckley
